Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim is rejected under 35 U.S.C. 102(b) as being anticipated by Schultz et al (US 5,238,070).

The control system for use in a subterranean well is met by control system shown in Fig. 2. The actuator is anticipated by actuators 128, and the control module is met by the electronic control package 152 which is interconnected between the actuator and two separate fluid lines 146, 172. The control package is operative to for controlling the predetermined volume of fluid from the actuator to the second line 172 in response to the increase in pressure differential between the two line. The language "meter" is anticipated by the fact that the chamber volume 108 is in fact is served as a metering device, since the volume flow into and discharged from the chamber is metered by the piston 122.

Allowable Subject Matter

Claims 2-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 11-30 are allowed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Upchurch and Gano all show downhole well tool control and apparatus.
